Summary

Front-end developer and UI/UX designer with 9 years of experience across the full design-to-deployment pipeline. Known for building accessible, reusable interfaces and for mentoring and collaborating in ways that help the whole team grow.

Work Experience

UI/UX Specialist @ Ziiware Inc

Apr 2024 – Apr 2026

- Designed and built a web ordering system in React and Typescript with Material UI to mirror our existing mobile app, delivering a web app that bridged B2B functionality with e-commerce familiarity.
- Designed a white label design system for a B2B SaaS product using Figma and Material 3 design principles. Used a visual language to convey meaning without relying on any fixed brand color or identity.
- Reduced friction in the mobile app using flow testing and support ticket analytics, reducing the number of clicks in our main flow by ~20%.
- Expanded mobile QA coverage with AI tools like Claude Code to generate and validate unit and integration tests with Flutter Test and Patrol, expanding QA coverage and cutting manual testing overhead.

UI/UX Developer @ IlluminateMI

Mar 2021 – Apr 2024

- Owned the frontend in the redevelopment of a legacy factory analytics app. Architected the build on a modern React and Typescript stack using installable micro frontends, reducing install size and improving long-term maintainability.
- Introduced UX research methods to the team, using user interviews and usability testing to inform design decisions that had been previously based on assumptions.
- Designed a modern UI in Figma using research feedback, emphasizing data visualization and at-a-glance clarity for customers.
- Led frontend development by providing technical guidance, pair programming, documentation and code reviews. This reduced blockers and led the team to surpass their support ticket goals.
- Mentored junior developers and co-ops on best practices and team culture, resulting in more confidence, more autonomy and stronger collaboration.

Full Stack Developer @ Xpresstec

May 2017 – Jan 2021

- Delivered web, desktop and mobile solutions across multiple industries, working across the stack to meet diverse client needs.
- Supported the growth of LunchBoxOrders, ranked 28th fastest-growing company in Canada in 2020, by developing and maintaining their .Net application as it scaled to serve schools across the region.

Education

Bachelor of Computer Science - Algoma University, 2017 - Magna Cum Laude
